## Research Fee

---

A. The City will charge a research fee based on the average of hourly wages from the various salary schedules. For the fiscal year 2026, the hourly research fee will be \$58.00, billed in 15-minute increments. The fee is calculated using the hourly wage, excluding the cost of benefits.

The City will establish a fee in its annual fee resolution that is reasonably calculated to reimburse the City for the cost of making public records available, including locating the requested records, reviewing the records to delete exempt material, redacting protected information, supervising a person's inspection of original documents to protect the integrity of the records, compiling, or tailoring a record, to meet the person's request.

The City may charge for search time even if it fails to locate any records responsive to the requestor or if the records located are subsequently determined to be exempt from disclosure. Copies of documents provided by a routine file search of 15-20 minutes or less will be charged at a copy rate established in the annual fee resolution.

In accordance with Oregon Public Records Law (ORS 192.324–192.440), and to promote efficiency and cost recovery, requests submitted by the same requester within 15 calendar days of a prior request will be considered a single request for the purpose of calculating research fees.

B. The City may charge a fee to reimburse the costs associated with the time spent by the City Attorney in reviewing public records, redacting exempt and non-exempt materials, and determining the application of ORS 192.505.

C. The minimum fee is \$25. Any research estimate above \$25 will be provided in writing to the requester in advance. The requester must confirm in writing that they want the City to proceed with making records available before the work is done.

D. Prepayment is required if the amount of the request is greater than \$25. If the actual charges are less than the prepayment, an overpayment shall be refunded.

# Building Miscellaneous Fees and Charges

## Permit Fees for Commercial and Residential

In accordance with OAR 918-050-0100: “Residential construction permit fees shall be calculated using the following methodologies. (c) Effective January 1, 2009, a structural permit fee for new construction and additions shall be calculated using the ICC Building Valuation Data Table current April 1 of each year, multiplied by the square footage of the dwelling unit to determine the valuation. The valuation shall then be applied to the municipality’s fee schedule to determine the permit fee. The plan review fee shall be based on a pre-determined percentage of the permit fee set by the municipality. (A) The square footage of a dwelling, addition, or garage shall be determined from outside exterior wall to outside exterior wall for each level. (B) The square footage of a carport, covered porch, or deck shall be calculated separately at fifty percent of the value of a private garage from the ICC Building Valuation Data Table current as of April 1. (C) Permit fees for an alteration or repair shall be calculated based on the fair market value as determined by the Building Official, and then applying the valuation to the municipality’s fee schedule

Commercial construction permit fees shall be calculated using the following methodologies. (c) A structural permit fee shall be calculated by applying the valuation to the municipality’s fee schedule with a set minimum fee. Valuation shall be the greater of either. (A) The valuation based on the ICC Building Valuation Table current as of April 1 of each year, using the occupancy and construction type as determined by the Building Official, multiplied by the square footage of the structure; or (B) The value as stated by the applicant and approved by the building official. (C) When the construction or occupancy does not fit the ICC Building Valuation Data Table, the valuation shall be determined by the Building Official with input from the applicant.”

State of Oregon permit surcharge is 12% of structural, plumbing, mechanical and electrical components of the overall building permit.

### Building Permit Refund Policy

The City of Ashland Community Development Department offers partial refunds for building permits that have been issued, have had no inspections performed and have not yet expired (six months from issue date). Refunds for permits that have expired are limited to any Systems Development Charges (SDC's) that were part of the permit fees.

### How to Request a Refund

Submit a letter of refund request signed by applicant/owner with a mailing address for the refund check to the Community Development Department at 51 Winburn Way. The refund will be processed within 30 days of the date of the request letter.

The following fees are not refundable

- Building Plan Check Fee
- Fire Protection Review Fee
- 50% of Community Development Fee (maximum equal to Building Plan Check Fee)
- 50% of Engineering Development Fee (maximum equal to Building Plan Check Fee)

The remainder of the permit fees are refundable. A \$50.00 administrative fee will be subtracted from the eligible refund amount for costs associated with the refund process.
